

RC D&D 3

Casing Scrubber

Product Data Sheet

RC D&D3 is a select blend of surfactants in an aqueous solution designed to displace and clean water base, diesel and mineral drilling fluids prior to completion operations. RC D&D 3 removes mud, sand, oil and polymer from all surface including workstring, casing, riser, tanks, pumps, lines, shale shakers and other surface equipment.

RC D&D 3 Physical Properties

Appearance	Green, Clear Liquid
Odor	Liquid Butyl
Specific Gravity @ 60°F	1.025
Density (lbs /gallon)	8.6
Flash Point	>200°F (TCC)
pH	7.5 – 8.8

Applications

Please consult a RIG-CHEM representative for an engineered recommendation.

Advantages

RC D&D 3 thoroughly cleans workstring, casing, riser and surface equipment prior to completion operations. Its use reduces or eliminates the need for filtering brine completion fluids.

Environmental Data

When used as directed and testing according to the U.S. Environmental Protection Agency's Static Sheen Test, RC D&D 3 does not form or create a sheen on the surface of receiving waters.

Handling

Improper handling of this product can be injurious to workers. Observe all safety precautions shown and labeled in the Safety Data Sheet.
